Professional Summary

Highly Skilled Solution Developer and Solution Architect with 13 years of IT experience, including 8 years in Data Engineering and 5 years in Data Architecture. Hands-on expertise across cloud platforms including Microsoft Azure (4.5 years), Microsoft Fabric, Azure Data Factory, Databricks, Power BI, as well as AWS (3 years) and Google Cloud (1 year). Proven track record of designing and delivering scalable, secure, and high-performing end-to-end solutions for organizations such as T-Systems, Softip, Billigence, Eyerim, Aardwark and ESET. Strong ability to translate business requirements into robust architectures, lead solution initiatives independently or within teams, and enable data-driven and operational decision-making. Experienced in Scrum and SAFe agile environments with strong stakeholder communication skills.

Accomplishments

- Delivered **two complex data projects** using Microsoft Fabric within the first 8 months of 2024, ensuring high-quality implementation and stakeholder alignment.
- Led and contributed to multiple data initiatives supporting small and medium-sized companies in migrating their data infrastructure to the cloud using **Microsoft Fabric, Power Platform, and SharePoint**.
- Successfully delivered a **Proof of Concept (POC) within 3 months** for the implementation of **Amazon Q AI service** into the Amazon QuickSight reporting platform for a client providing contact center management software.
- Supported a major reinsurance company in migrating its reporting platform to meet **Solvency II compliance requirements**. In addition to managing key data-related tasks, designed and implemented a **Single Sign-On (SSO)** solution to enhance security and user access management.
- Delivered multiple projects within the Microsoft ecosystem in cooperation with one of Slovakia's leading solution providers, Softip a.s.
- Collaborated with global data solutions provider BILLIGENCE PTY LTD to deliver complex data and analytics projects using **Power BI** and **Snowflake** as the core data engineering platform..

Skills

- Google Analytics
- Microsoft SharePoint

- Microsoft Fabric 
- Microsoft Azure 
- Microsoft Power Platform 
- Data Analysis Expressions (DAX) 
- M-language 
- Python 
- Power BI 
- Identity and Access Management 
- IT support 
- Lucid chart 
- Jira 
- Azure DevOps 
- Git hub 
- Confluence 
- Agile development 
- Data analysis tools 
- Data warehousing 
- Data governance 
- API integration knowledge 
- Agile methodology knowledge 
- Spark SQL 
- Apache Airflow 
- Azure Databrics 
- Azure Synapse Analytics 
- PySpark 
- Pandas 
- Numpy 
- Snowflake 
- Client service 
- Operations management 
- Business management 
- Business planning 
- Project management 
- Customer relations 
- Relationship building 
- SQL 
- Data visualization and presentations 
- Data analysis 

• Data cleaning

• SQL databases

• Analytical problem solving

• Statistical analysis

• Attention to detail

• Data validation

• R programming

• Database management

• Machine learning

• Data modeling

• Report preparation

• Report writing

• Data storytelling

• Data mapping

• Data mining

• Reporting tools

• Data exports

• Data science

• AWS

• Amazon Quicksight

• Amazon Q

• ETL processes

• AWS Redshift

• Query Performance Tuning

• Google analytics

• Technical analysis

• Data quality assurance processes

• Clear and concise communication

• Predictive modeling

• Data integrity validation

• Process improvement

• Optimization techniques

• Data engineering

• Report design

• Microsoft Purview

• Terraform

Work History

02.2024 - Current

- Sparx Systems Enterprise Architect

Owner / Solution Architect

Bc.Adam Suchodolsky IT & Data Services - Pezinok - Modra, Slovak Republic

- Working with leading service providers Aardwark, Soffip and Billigence to provide best in class solutions to customers.
- BPMN modeling using Camunda
- Building solution cloud architecture using Lucidcharts
- Design and implementation of Azure Lakehouse solutions
- Hands-on development of Databricks pipelines using PySpark and Spark SQL
- Migration of legacy DWH/reporting systems to Azure
- Implementation of Medallion architecture
- Data governance integration (Purview)
- End-to-end ownership: ingestion → transformation → modeling → Power BI
- Developing solutions based on Power platform technology. Delivered two complex Microsoft Fabric data projects in 2024 within tight timelines following others in 2025.

Azure Migration & Modernization Experience:

- Hands-on involvement in migration projects including:
- Solvency II reporting platform migration (reinsurance sector)
- Manufacturing reporting modernization
- E-commerce data transformation solutions
- Migration of accounting software database towards cloud for Power BI reporting
- On prem data migration towards Fabrics for health insurance sector

Responsibilities included:

- Target architecture design including architecture visualization using Lucidcharts
- Pipeline build (ADF + Databricks or Fabric)
- Refactoring transformations to PySpark or SparkSQL
- Security and access design
- Building bronze, silver and gold layer in Databricks or Fabric using lakehouse architecture.
- Power BI or alternative solution (Quicksight, Looker, Tableau, Clicksense) integration on Gold layer

05.2025 - 07.2025

Data Analyst

Eleveo - Košice, Slovakia

- Utilized **Amazon QuickSight and Amazon Q AI Assistant** to develop innovative data solutions and features.
- Collaborated with the engineering team at **Eleveo** to create next-generation reports supporting product enhancements.
- Contributed to the development of **data-related product solutions** at Eleveo, improving user experience and operational efficiency.
- Created **data solution architecture wireframes using Enterprise Architect**, modelling data flows, system components, and integrations to support product and reporting solutions.

04.2023 - 01.2024

Power BI Developer

Deutsche Telekom Systems Solutions Slovakia s.r.o. - Bratislava, Slovak Republic (Remote)

- Worked primarily on **backend operations and Azure infrastructure**, while also overseeing and monitoring solution development across Azure environments.
- Authored **disaster recovery documentation** and actively participated in **disaster recovery training**, including running multiple disaster simulations, rerouting traffic to alternative Azure regions, and restoring normal operations post-incident.
- Designed, built, and deployed **Azure Monitor dashboards within one month**, tracking critical Azure resources and configuring **alerting mechanisms** to notify team members of incidents.
- Administered **on-premises infrastructure** alongside cloud responsibilities.
- Delivered **Power BI solutions**, including a **Power BI Service App** that retrieves **Azure Active Directory data** to provide visibility into data domain users and content security settings for domain owners and support teams.
- Automated data ingestion and refresh processes using **Power Automate**.
- Managed **Azure cost monitoring and reporting**, creating dashboards and analytical reports to identify **MoM and YoY cost changes**, including root-cause analysis using features such as **decomposition trees**.
- Developed **cloud infrastructure automation** using **Terraform** to ensure consistency and scalability.
- Led and supported the establishment of **data governance policies**.
- Contributed to the organization's **transition toward a Lake architecture**, leveraging **Databricks**.

06.2021 - 03.2023

Cloud Cost Analyst

ESET, spol. s r.o. - Remote

- Designed and implemented an automated reporting solution for Azure cloud costs based on Power BI reports and dashboards
- Able to save tens of thousands in cloud costs with a minimum of money invested.
- Creating reports every month for Azure cost savings recommendations using Azure Advisor and delivering them to the subscription owner for review by publishing reports on the Power BI service platform and confluence platform
- Implement cost-saving recommendations after receiving positive feedback from subscription owners, in case there is a need for help with implementation, by creating Azure reservations or similar cost-reduction implementations.
- Designed and implemented tracking solution for all cost-saving recommendations proposed using Jira and Confluence
- Tested process automation using the Power platform, such as automation of Jira issues creations to save time that was needed for forecasting projects.
- Generating a dashboard with monthly data for C-level management showing statistics about how much money was saved thanks to implemented recommendations, how much money was wasted by not receiving a response, and the rate of not valid recommendations (resources do not exist anymore, resources used only temporarily, planned architectural changes, etc.)

08.2019 - 05.2021

Enterprise Tech Supp Sr. Analyst

Quest Software - Bratislava

- Helped solve Azure-related issues and refund claims by managing escalations within Microsoft, with one specific successful claim of over 60K.
- Designed and delivered migration solutions for customers transitioning to Microsoft 365, including SharePoint migrations using Quest Essentials and Content Matrix.
- Administered and troubleshooted Azure Storage used as temporary staging during migration projects, ensuring secure configuration, proper access control, and optimal performance to support successful data transfers into Microsoft 365 environments.
- Configured and secured Azure storage accounts with focus on data protection, access policies, and overall migration reliability.
- Managed and maintained key migration projects for high-value customers in finance and manufacturing sectors.
- Recreated customer environments for troubleshooting and testing purposes, leveraging Microsoft Azure (including developer/testing capabilities such as Azure DevTest Labs) and prepared templated SharePoint environments to rapidly virtualize different SharePoint versions.
- Provided advanced technical support, created knowledge base articles, and collaborated closely with development teams to address bugs and feature requests, ensuring smooth project delivery.

10.2018 - 07.2019

Program Manager

Amazon /Slovakia/ s.r.o. - Bratislava

- I attend business status meetings with top management and prepare weekly newsletters on hot topics and issues related to the Direct fulfillment program.
- Successfully integrated vendor with a potential of over 1 million euros in sales by helping them solve technical issues.
- I helped resolve issues with a German delivery partner. The partner had problems processing parcels due to incorrect data in its systems. This led to lost parcels or orders worth tens of thousands being partially shipped, and the partner refused to collect any new parcels. I found the required missing data and successfully re-established the delivery process in cooperation with the delivery partner.
- Responsible for training vendor support team members and responsible for a high level of vendor support.
- Tasks from previous Direct Fulfillment specialist role

06.2017 - 09.2018

Direct Fulfillment Specialist

Amazon /Slovakia/ s.r.o. - Bratislava

- Communicated with direct fulfillment program vendors and helped them solve complex issues.
- Generating operational reports for the Direct Fulfillment program using Oracle SQL and later Postgres SQL.
- Using company ETL solution to get additional data tables to be able to fulfill ad hoc reports
- Created a metric that tracked negative customer service contacts, and if the metric ratio was exceeded, the vendor was notified and asked to make adjustments. If that adjustment did not happen, the vendor was removed from the platform to protect the customer.

- I worked on a report solution that tracked vendors that did not ship orders and removed them from the platform. If the vendor started shipping out of nowhere after a long time, the carrier would not be aware of picking orders, creating a bad customer experience.
- Designed and implemented a solution that extracted data regarding packages that needed to be picked up by the carrier on that day and sent info via automatic emails to the carrier. This solution was especially focused on new vendors where carriers do not come to pick up orders.
- Helped create reports that searched for stuck orders, which led to finding stuck orders with a net value of over 100 000, which led to the discovery of proactive changes to prevent the recurrence of such orders

02.2017 - 05.2017

External Helpdesk Member

Diebold Nixdorf - Bratislava

- Worked as a freelancer on providing high quality help desk support to client customers.
- Successfully managed over 100 of customer service calls in tight SLA.
- Communication with customers regarding issues with cashier systems.
- Managing service technicians in assigned region and assigned them service assignments to make sure SLA is met.
- On call support during after hours and weekends.

12.2015 - 08.2016

Accountant Clerk/SharePoint Administrator

JOHNSON CONTROLS INTERNATIONAL spol. s r.o. - Bratislava

- Accounting tasks regarding checking the correct billing on sensitive accounts like representation spending, brand exposure spending or travel expenses.
- SharePoint administration tasks (access management, new features, add on etc.).
- Helping with the account reconciliations upload to SharePoint.
- Maintaining share point lists with account reconciliations and supporting administrative tasks related to SharePoint functionalities to maintain easiest possible process.
- Supporting users by quickly solving more than 200 tickets
- Managed to deliver 100 percent reconciliations approval rate each month without any incorrect data uploaded.

Education

08.2013

Bachelor Degree, Applied informatics, Paneurópska Vysoká Škola - Bratislava, Slovak Republic

05.2008

GED, Business Academy, ZŠŠ SDJ Samuela Ormisa - Revúca, Slovak Republic

Certifications

- Data Engineering Foundations Professional Certificate by Astronomer
- Career Essentials in Data Analysis by Microsoft and LinkedIn
- Atlassian Agile Project Management Professional Certificate
- Anaconda Python for Data Science Professional Certificate
- SAP BTP For Beginners
- Managing Clean Core for SAP S/4HANA Cloud - Record of Achievement
- Microsoft Certified: Power BI Data Analyst Associate, Microsoft
- Microsoft Certified: Azure Administrator Associate, Microsoft

- Microsoft 365 Certified: Security Administrator Associate, Microsoft
- Microsoft Certified: Azure AI Fundamentals, Microsoft
- Microsoft Certified: Power Platform Fundamentals, Microsoft
- Microsoft Certified: Dynamics 365 Fundamentals, Microsoft
- Microsoft Certified Teams Administrator Associate, Microsoft
- Microsoft Certified Azure Data Fundamentals, Microsoft
- Microsoft Certified Azure Fundamentals, Microsoft

Additional Information

I have more than 5 years of experience providing support on multiple levels. I have also proven experience in improving processes and process automation. I have also more than 3 years of experience in data analysis related roles. I have more than 2 years experience with Microsoft Azure. I am proud owner of 10 Microsoft certifications and I am constantly learning new things. I am very passionate type of person and very proactive about solving issues. I am also communicative person with lot of experience of presenting data across all organizational levels.

Languages

English:  Fluent

German:  Beginner

Slovak:  Native

Personal Information

- Date of birth: 02/14/89
- Driving License: B
- Nationality: Slovak

Ways Of Working

- SCRUM / SAFe environments
- Strong ownership mindset
- Direct communication with business stakeholders
- Architecture awareness combined with engineering execution
- Cost-conscious engineering approach

Key Skills & Experience

- 10 years of experience in IT
- 9 years in Data Engineering
- 6 years in Data Architecture
- 6 years in Power BI (Microsoft Certified)
- 4.5 years in Microsoft Azure (Certified)
- 2 years in Microsoft Fabric
- 3 years in Azure Data Factory
- 3 years in Databricks
- 3 years as Solution Architect (T-Systems, Bizztreat, Eyerim, ESET)

Hobbies

data analytics, learning new technologies (especially cloud technologies), travelling, family, computer games, music, movies, reading a book, smart technologies and automations
